Cambridge, MA

EDUCATION

Massachusetts Institute of Technology

Cambridge, MA

B.S. in Electrical Engineering and Computer Science

B.S. 2024

• **Relevant Coursework:** Python Programming, Design & Analysis of Algorithms, Probability & Random Variables

SKILLS

- **Programming Languages:** Python, JavaScript, HTML/CSS
- **Tools:** Git, Django, Flask, React, JSON, RESTful APIs
- **Spoken Language:** Spanish (Conversational)

EXPERIENCE

MIT Department of Electrical Engineering and Computer Science

Cambridge, MA

Graduate Teaching Assistant

Sep. 2024 – Present

- Teach intermediate Python programming (6.101, Spring '25) and linear analog circuits (6.200, Fall '24)
- Lead recurring open lab hours for students to receive 1-1 help on course material
- Guide students through approaches for designing and analyzing software and analog circuits for abstract problems
- Perform checkoff assessments to test students' understanding of each lab assignment and the approaches for solving them

Engineering Tomorrow

Virtual

Curriculum Development Intern

Jun. 2023 – Aug. 2023

- Designed curricula for lessons introducing engineering topics to underserved high school students
- Developed a Python-based walkthrough of a dynamic-programming solution to the Traveling Salesman Problem
- Drafted explanations of neural networks for students with zero background; began with no prior exposure to the subject
- Reformulated an intro presentation on embedded systems that explores circuits, Arduino programming, and sensors

Sponsors for Educational Opportunity (SEO)

Virtual

Tech Developer Program

Jun. 2022 – Aug. 2022

- Participated in a career preparation and mentorship program to develop technical and soft skills in software engineering
- Completed 300+ hours of technology-focused training on full-stack software development, testing, and documentation
- Practiced Agile methodology by developing projects iteratively and engaging in daily stand-up meetings
- Designed web applications using Python (Flask), HTML/CSS, JavaScript, and SQLite

MIT Digital Humanities Lab

Cambridge, MA

Undergraduate Programmer/Researcher

Sep. 2020 – Aug. 2021

- Collaborated on a team of about 20 undergraduate programmers to deliver full-stack web app prototypes
- Developed software using web frameworks and technologies such as Django, React, NumPy, and Git/GitHub
- Designed test suites in Python for APIs between the frontend and backend of an application
- Led new members of the lab in adopting new technologies and solving problems in software

PROFESSIONAL DEVELOPMENT

Gordon-MIT Engineering Leadership Program (GEL)

Cambridge, MA

Gordon Engineering Leader I, II

Aug. 2022 – May 2024

- Engaged in a selective leadership development program focused on leading effectively in industry engineering teams
- Coached a team of six students in various lab activities meant to simulate real-life problems faced by teams in industry; delivered performance reviews to the team leader each week
- Actively practiced communication skills by writing weekly email updates to the GEL community of over 100 students
